

Rev 12 | 1 Apr 2026

GBS Solutions Corporation (GBS) was founded in 2014 to deliver high quality, innovative business and technical solutions. We deliver a customer-centric approach and proven management processes to each project we undertake, striving to exceed our customers' and employees' expectations with everything we do.

We also offer solutions and services through our joint venture: GBS-Sabre Innovative Solutions, LLC (an SBA-approved mentor-protégé relationship, www.gbssabre.com).

Company Data

Registrations: UEI NKNSTJBPABX9 | CAGE Code 79PQ1

NAICS Codes: *Primary* – 541512 | *Other* – 488991, 488999, 493110, 493190, 541330, 541511, 541513, 541519, 541611, 541614, 541618, 541690, 541715, 541990, 561320, 561499

Certifications

Contract Vehicles

- GSA MAS No. 47QTCA23D00DS
- SeaPort-NxG No. N0017825D7379
- GSA OASIS+ SB No. 47QRCA25DSA43 (R&D and T&E Domains)

Solutions and Services

IT Support Services

- Computer Facility (CF) Operations
- Customer Service Support (Helpdesk)
- Cybersecurity Control Implementation, Monitoring, and Assessment
- System Administration (Linux, Office 365, Windows, SharePoint, Cloud, etc.)

Operations Support

- Aviation Depot Support: Material Asset Management, Program Planning, and Production Support
- Respirator Operational Performance, Maintenance, and Distribution
- Force Modernization and Structure

Program Management

- Communication Support
- Customer Relationship Management
- Program and Project Support
- Capability Gaps and Requirements Analysis
- Stakeholder Engagement

Scientific and Technical Support

- Artificial Intelligence (AI) and Machine Learning (ML): HPC, Digital Twins, RAG
- AI Risk Management Framework (RMF)
- Augmented Reality (AR)
- Lab Automation Development
- Wireless Channels: Brain Computer Interface, Bioinformatics Methodology, and 3D Computational Models

Software Engineering

- Agile Project Management
- Data / Cloud Migration
- Database Analysis, Design, Development, and Implementation
- Development, Modernization, and Enhancement Support
- IT Modernization and Optimization
- Mobile Device Management
- SharePoint Configuration, Development, Implementation, Migration, and Support
- Website Development and Maintenance

Notable Past Performance

Customers

IT Support Services

Customer Service Support: We provide helpdesk services (ServiceNow) for the NIST Customer Access and Support Division, which serves as the customer-facing, single point of contact between OISM service providers and Department of Commerce agency employees; NIST employees, guests, and associates; and contracted third-party organizations for customer service and device support.

System Administration: We support engineering, scientific, and technical applications for the Bureau of Reclamation's Technical Service Center. Our efforts include Linux, Windows, network, and scientific systems administration.

Operations Support

Aviation Depot Support: We have experience providing maintenance, repair, and overhaul (MRO); facilitate other maintenance (FOM); planning / scheduling; program planning; production support; and local manufacturing (LocalMan) processes for the Ogden Air Logistics Center.

Respirator Operational Performance, Maintenance, and Distribution: We collect, store, disassemble, repair, inspect, clean, sanitize, and deliver full- and half-face respirators for the Ogden Air Logistics Center at Hill Air Force Base.

Program Mgmt.

Communications Support: We provide design, layout, infographic development, and document formatting for a range of visual communications products, including standard operating procedures and management dashboards, for the Export-Import Bank of the United States (EXIM).

Customer Relationship Management: We managed and supported the Census Office of Strategic Alliance's partners and stakeholders throughout the entire 2020 Census communications campaign, successfully establishing more than 1,000 national partners to motivate participation.

Scientific and Tech. Support

Artificial Intelligence (AI) / Deep Learning (DL): We developed AI / DL models and software for the NIST Applied and Computational Mathematics Division. We supported planning and execution of a multi-tier AI Red Teaming exercise and bounty program for DEFCON 32 Aug 8-11, 2024. We also provide specialized technical expertise to NIST staff to promote development and adoption of technically sound international standards in line with NIST AI RMF initiatives.

Wireless Channels: We develop bioinformatics methodology, 3D computational models, and programming modules to assess wireless communication channel characteristics for wearables, implants, and ingestible electronics for NIST ITL.

Software Eng.

SharePoint Dev., Implementation, Migration, and Support: We migrated and re-engineered complex workflows that existed in an on-premise SharePoint 2016 environment to a modern SharePoint Online environment for the NIST Office of Acquisition and Agreements Management (OAAM).

Web Dev. and Maintenance: We provide back-up support and maintenance for the National Science Board Office public website, including web administration and content needs, NSB publications, PDFs, website, and §508 compliance.
